

HOPE

Planet earth, we know, is in a fragile state
and it's up to us *all* what will be it's ultimate fate
But as long as *you* are part of the solution
Then HOPE will triumph in its thought revolution

You too can *reduce, re-use, recycle* and *reclaim*
each little action helps us achieve our important aim
We *all* contribute to the environment that's around
and so create HOPE that earth can rebound

If you reduce your *own* pollution
That's also an important contribution
If you also use as little as you possibly can
there's greater HOPE for this earth's life span

There's lots that's natural you can use
we just need to spread this good news
Not all we use on this planet can we renew
the only HOPE is in a more *sustainable* view

So whilst the problems at times seem so immense
there are lots of small measures that are just commonsense
Don't let others your choices manipulate
just *do* what you *know* will help HOPE regenerate

Besides it not just you alone that'll stand for what's right
there's a *whole community* that's concerned about earth's plight
so don't be dismayed and do *nothing* at all
there's HOPE for our world if *you* just heed the call!

HOPEFUL

Everywhere you go today
people are *unhopeful* about our earth
But there's still HOPE in the middle of it,
I should point out for what it's worth!

I also heard someone say the other day
That the environment's in a *hopeless state*,
But if HOPE's in Queensland
we should set them straight!

And even If the environment is
a sad and sorry case
with HOPE in Toowoomba
it's now a *hope-filled place*

So if you're doing your bit
then that's a *hopeful start*
and HOPE is not just around
but in your heart!
