Re: Report on Screening of “*Climate Changers*” documentary

On Wednesday, 1 May 2024, Householders' Options to Protect the Environment (HOPE) Inc. and co-host School of Agriculture and Environmental Science, University of Southern Queensland (UniSQ) Toowoomba, screened the ***Climate Changers*** documentary featuring Prof. Tim Flannery from Climate Council Australia.

Seeking answers to questions such as *Where are the climate leaders? Who will drive change? How might they succeed where others have failed?* Professor Tim Flannery speaks with global leaders from the corridors of power and frontlines of climate change. ***Climate Changers*** delves into what frustrated Tim, what motivated him, and explored where Tim believed the solutions lie to humanity's greatest challenge.

Attendance numbers were small, despite extensive promotion of the screening of this documentary through many avenues. Perhaps, the screening time – early afternoon, mid-week; contributed to the attendance capacity.

Attendees at the Toowoomba screening of the documentary felt that the documentary could have been more 'hard-hitting' – considering that the inference was that governments, at all 3 levels, just weren't showing strength of leadership in addressing climate change related issues.

For actions that interested individuals may take, go to the *Climate Changers* website link <https://climatechangersmovie.com/take-action/>.
