

HOPE Strategic Plan 2024 - 2029

FOCUS AREAS

Advocating for responsible and sustainable stewardship of the environment

Overview of Focus Area

HOPE's eight focus areas represent interconnected environmental challenges, ranging from policy and climate drivers to impacts on natural systems, biodiversity and animal welfare. Together, they guide HOPE's advocacy, education, and stewardship.

Interconnected Environmental Systems

Policy & Climate

Natural Systems

Biodiversity & Welfare

Environmental challenges are interconnected and cannot be addressed in isolation.

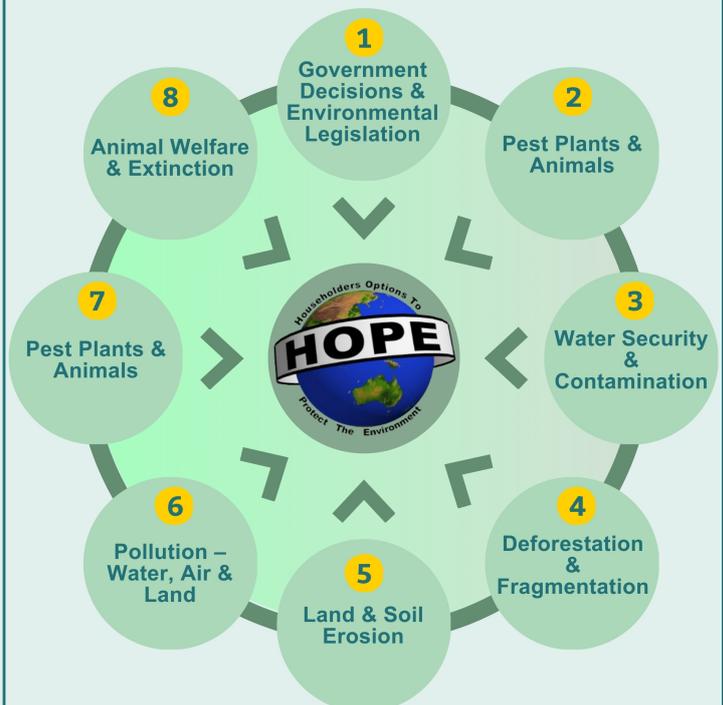

The focus areas inform HOPE's research, advocacy and community engagement, supporting meaningful environmental impact.

HOPE's Stewardship Framework

Highlights HOPE's guiding role in interconnected environmental focus areas.

Biology Enhance > **Natural Systems** > **Biodiversity & Welfare**

HOPE supports environmental protection through advocacy, education and community engagement. The stewardship framework helps connect policy, environmental systems and biodiversity outcomes in a clear and consistent way.

HOPE works with communities, partners and policymakers to protect Australia's environment.
